

Meeting Minutes (November 18, 2024)

Format: Online via Discord

Date: November 18, 2024

Duration: 8:35 pm - 9:30 pm (55 mins.)

Attendees: Jason, Kate, Gabby

I. Discussed Items

- Discussed issues between closetView class and editClosetView program design.
 - Gabby will work on changing up the closetView class and making sure that functions that should be executed in closetView are not in editClosetView
 - There's a bug in the editClosetView regarding the panels.
- Discussed how the dashboard will connect to the database.
 - The closet database connectivity must be implemented first in order for the dashboard to work properly.
 - While Jason waits on closet to fully be functional, he will think about how to retrieve data from the SQL by reviewing the SQL queries and table designs.
- Discussed finishing touches for the forum.
 - Kate needs to add a delete function for only the posts that belong to the logged in user
 - Kate needs to figure out how to add a comment system for the posts.

II. Users Stories Selected for Current Sprint

- As a user, I would like a closet feature where I can add, delete, and edit my clothing information.
- As a user who wants to interact with the sustainability community, I would like a forum system where I can add, delete, and edit my forum posts.
- As a user, I would like to know about the sustainability ratings of clothing brands and types of materials through the dashboard so I can consider my clothing habits.
- As a user who is conscious about sustainability, I would like to see the numbers and percentages of my carbon footprint so that I am aware of my environmental impact.

III. Users Stories Completed Overall

- As a new user, I would like to be able to add clothes via a form layout so that the information is clean and clear.
- As a user, I would like to be able to use a navigation bar so that I can easily navigate and access through each core functionalities of the application.
- As a user, I would like to be able to scroll through a page that contains a lot of information so that all the information is not cramped and hard to read.
- As a user who wants to access their own personal closet, I would like to register my own account using a user management system (login/signup) so that I can access my own information and so others can't access my account as well.
- As a user conscious about the privacy of my data, I would like my account to be secure through encryption so that no one can easily hack into my account.
- As a user who enjoys the design of applications, I would like to see an application with a set color, font, and layout theme and design so that it enhances my user experience.
